

```
1  # Baba Yaga Storyboard
2  - Create around 3 minute video movie with good audio about Baba Yaga
3  - It will be created using ComfyUI and MiniMax H3 models
4  - All this will be running on local machine - AMD Ryzen 9 9900X with 32GB RAM and GPU RTX
   5080
5  - The movie will be progressively built. It will consists of multiple Acts.
6  - Use the minimax h3 prompt writing guide while generating the prompts:
7
   https://huggingface.co/MiniMaxAI/MiniMax-H3/blob/main/docs/VIDEO\_PROMPT\_WRITING\_GUIDE\_base\_en.md
8  - Agent skills: https://github.com/MiniMax-AI/MiniMax-H3/tree/main/skills, available
   locally as: h3-prompt-writing
9
10 ## Goals
11 The following are the Goals:
12 a. To create screen play that will guide the video generation
13 b. To visualize the screen play using MiniMax H3 using comfyui tool
14
15 ## Screen play
16 ### Synopsis:
17 This is story about about Baba Yaga - the Slavic folklore character
18
19 ### Act-1
20 Act-1 is the introduction of Baba Yaga. Here is the summary of the scenes
21 1. Baba Yaga is blissfully living life in her hut surrounded by beautiful medieval
   garden in deep woods - emphasis on blissful living
22 2. The house is as described in folklore - in deep woods, hut standing on tall chicken
   legs - emphasis on chicken legs
23 3. There are mischievous boys (4) playing medieval football nearby
24 4. They accidentally kick the ball into Yaga's house breaking the lantern hanging in
   front of her house
25 5. Yaga coming running and seeing the wreckage, gets really mad and angry
26 6. She takes the ball and decides to teach the kids a lesson
27 7. The kids plead Yaga to give them the ball back
28 8. Yaga is in no mood to listen - she deflates the ball with her sharp finger nails -
   dramatic action of deflating
29 9. The ball bursts into pieces
30 10. Seeing that, the kids get really angry and curse Yaga - to be banished to New York
   City
31 11. Next scene should show the busy New York Port Authority Bus terminal
32 12. And suddenly Yaga appears in her medieval Slavic attire in modern day busy Bus
   terminal
33 13. Suddenly people are in awe of this medieval woman from nowhere and staring at her
34 14. A pigeon flies towards Yaga
35 15. Yaga grabs the pigeon and eat it alive and gives a big burp - need to be dramatic
36 16. The people watching this action are really disgusted and start murmurs
37 17. Suddenly Port Authority Police arrive and surround Yaga in dramatic fashion with
   dramatic music crescendo for finale of Act 1
38 18. In the final shot, Yaga says in Russian, "Sergey - local LLM's are not bad - embrace
   it!", with wicked smile
39 19. The spoken language by the characters is in English
40 20. End of Act-1
41
42 ### Instructions
43 Use the Act-1 details labelled 1-20 above to do the following:
44 a. Create detailed scenes from the above description
45 b. For each scene build shots that will be used as prompts to MiniMax H3 workflow in
   ComfyUI
46 c. Note: the max length of any shot can only be 15 seconds - per MiniMax H3 - longer
   shots should be broken down
47 d. Each of these shots will be stitched together to form the full Act 1 video - so
   continuity between shots is important
48 e. Save the detailed screenplay for review as markdown file - named act_1.md
49 f. For each of the shots in act_1.md create detailed minimax-h3 instructions in file
   named h3instr_1.md
50 g. If you need to edit/change any shot section in act_1.md or h3instr_1.md,
   *rewrite/replace* the whole shot section instead of creating tools to edit/change
```

specific lines/words

51 h. Each shot in h3instr_1.md ****MUST**** be detailed and follow all the MiniMax-H3 requirements and much have the following sections - Integrated Prose Description, Scene Background Description, Characters Description, Timeline Breakdown, Audio Layout, Style & Textures and any other relevant details - verify after you write each shot to double check it has all the sections mentioned - verify again each sections are written in each shot

52 i. Each shot ****MUST**** have proper timing that serves the emotional gravity of each moment

53 j. Each scene/shot will be rendered by the comfyui independently - it has no recollection of the prior scene's/shot's descriptions - so in each scene the details has to be complete (and repeated) - independent. this is ****CRITICAL**** to be consistent across scene/shots and maintain similarity and continuity of the scene and background

54 k. Summarize all the scenes in tabular format - example column headings: scene, content, key shots - named in file scene_summary.md

55 l. See an example how the shot has to be described:

56 --- shot description start

57 **## Shot 2: Boys Playing Medieval Football (~15s)****

58 **### Integrated Prose Description**

59 Live-action, cinematic, medium-wide tracking shot from behind as four mischievous boys aged 8-12 dressed in tattered medieval tunics and leather boots run across the dirt garden path kicking an old worn-leather football with visible stitching. One boy wearing a pointed conical hat dribbles the ball past raised flowerbeds while another chases behind carrying a rough-hewn wooden shield strapped to his back. They laugh loudly, heads thrown back, as they sprint toward the garden perimeter fence, the leather ball bouncing rhythmically between their legs with each stride - thwack against stone, hop along dirt, thwack again - producing a lively staccato percussion that matches the energy of their movement and carries clearly through warm afternoon air.

60

61 **### Scene Background Description**

62 ** **Medieval forest:** Rustic overgrown with medieval plants*

63 ** **Visual Profile:** Live-action, highly detailed cinematic realism, rich organic textures, sharp focus, naturalistic lighting with shallow depth of field.*

64

65 **### Characters Description**

66 ** **Character Profile <Yaga>:** Baba Yaga, an old Slavic folklore witch with deeply weathered, wrinkled skin, piercing dark eyes, sharp prominent cheekbones, and long, claw-like fingernails. She wears a rustic medieval Slavic outfit consisting of a tattered charcoal-grey wool tunic, a frayed burlap shawl pinned with a bone brooch, and a patterned crimson headscarf wrapping her silver hair.*

67 ** **Environment Profile <Hut>:** a rustic wooden log hut standing on two tall, scaly yellow chicken legs. The hut has a moss-covered thatch roof and a wooden front porch with a glowing glass lantern hanging from the overhanging eaves.*

68

69 **### Timeline Breakdown**

70 *[0s-2s]* Tracking shot from behind at fast speed following boys running across packed earth path - leather boots thudding with each step kicking up small clouds of dust, conical hat bobbing above shoulders as oldest boy leads the pack dribbling ball between feet while younger ones flank him laughing breathlessly.

71 *[2s-3.5s]* Camera maintains medium-wide frame with moderate amplitude following their trajectory toward garden perimeter fence line - boys' medieval tunics flapping in warm breeze, one smaller boy trailing behind grinning as he watches the ball roll ahead of them while his companion yells encouragement and they all laugh together producing overlapping giggles that rise above ambient forest sounds.

72 *[3.5s-4.5s]* Ball arcs upward into frame as oldest boy lifts leg and kicks it high - camera tracks the flight arc at fast speed with small controlled amplitude keeping ball centered, leather panels catching golden afternoon light showing worn texture and stitching detail against blue sky background while boys' faces blur slightly in pursuit below.

73 *[4.5s-6s]* Hold on boys running ahead of flying ball with wind picking up from tree movement behind them - camera remains locked on group's backs as they continue sprinting toward fence line, laughter audible in background layering over rising whoosh of wind through birch branches producing natural atmospheric texture that builds anticipation for what lies just beyond garden boundary.

74

75 **### Audio Layout**

76 ** **Diegetic soundscape:** Heavy tactical boots sprinting on concrete, the sharp metallic click of utility gear shifting, authoritative police shouting: <d>[en] "Step*

back! Don't move! Hands where I can see them!"</d>, and the deep, defiant animalistic growl from <Yaga>.

* **Non-diegetic orchestration:** A massive, driving orchestral crescendo featuring heavy war drums, screaming brass, and high-intensity percussion that rises to a deafening, dramatic peak before cutting instantly to black.

Style & Textures

Realistic live-action cinematic, warm natural afternoon lighting catches boys' medieval costumes and leather boots showing texture detail – tattered tunics in faded earth tones catching golden light on edges while worn leather boots display scuffs and dirt marks from extensive play across garden paths. Slight motion blur on fast movement captures kinetic energy of running sequence without obscuring key details, shallow depth of field keeps garden background softly blurred into impressionistic bokeh circles formed by wildflowers catching sunlight behind running figures creating painterly backdrop that emphasizes boys' energetic foreground action throughout entire six-second duration from initial tracking through final hold moment.
